

– Accelerate your Science Research and Education with JoVE –

Whether you are looking to integrate [JoVE videos](#) into your courses and online lab classes, looking for experiments to add to your repertoire, or thinking of publishing your own video article; this webinar is for you.

JoVE is the world-leading producer and provider of science videos that increase the productivity and efficacy of STEM research and education. Our library includes more than 12,000 science videos across multiple disciplines and provides the breadth and depth needed to meet the needs of science students and researchers at all levels.

Join us on January 26th (Biology Webinar), February 4th (Chemistry Webinar), or February 9th (General Webinar) at 5PM JST.

■ Speaker : Maaïke Pols PhD, Scientific Advisor, JoVE

Dr Maaïke Pols obtained her PhD in Cell biology from Utrecht University, The Netherlands. Her Research focused on intracellular transport with links to Cancer Research and Immunology, and she was involved in teaching Cell Biology and Microscopy classes and lab courses. After a postdoc at the University of Queensland, Australia, she moved to London as an Developmental Editor at F1000 Research Ltd. She joined JoVE in 2017. Currently, as JoVE's Scientific Advisor, she has been helping faculty members from universities around the world to make the best use of JoVE's scientific videos for Research and Education.

■ Language: English
